

HIMANSHU RANE

CYBERSECURITY & DIGITAL FORENSICS ANALYST

+91 8237827752 | himanshu.rane.304@gmail.com | LinkedIn: ranehimanshu | Portfolio: himanshurane.github.io

OBJECTIVE

Cybersecurity and Digital Forensics postgraduate with hands-on experience at government forensic labs and real-world cybercrime investigations. Skilled in disk, memory, and network forensics, incident analysis, and threat detection. Solid foundation in DFIR, SIEM, and cloud security with practical exposure to law enforcement workflows and forensic reporting.

EDUCATION

B.Sc. Cyber Security Savitribai Phule Pune University (SPPU)	2022-25
M.Sc. Cyber Security National Forensic Sciences University (NFSU)	2025-27
Diploma in Cyber Law Savitribai Phule Pune University (SPPU)	2025-26

LANGUAGES

English | Hindi | Marathi | French (Elementary) | German (Elementary)

KEY SKILLS

Technical Skills

Digital Forensics: Autopsy, EnCase, FTK, Magnet AXIOM, Cellebrite UFED, Tableau, Volatility, Oxygen Forensics, Sleuth Kit, WinHex, Sysinternals Suite
SIEM & Monitoring: Splunk, AWS SIEM, Wazuh, ELK Stack (basic), Sysmon, Log Analysis
Security & Networking: Wireshark, Nessus, TCPdump, Nmap, Network Traffic Analysis
Cybersecurity Tools: Burp Suite, Metasploit, Hydra, Nikto, SQLmap, Gobuster, Dirsearch
Malware & Memory Analysis: FLOSS, PEStudio, Volatility
OSINT & Reconnaissance: Maltego, theHarvester, Shodan, Recon-ng
Cloud: AWS (EC2, S3, IAM, CloudTrail, Guard Duty)
Programming/Scripting: Bash, Python (basic automation, payload scripting)
Operation System: Windows, Linux (Kali, Ubuntu), macOS

Core Competencies

Incident Response | Threat Analysis | Digital Evidence Handling | Chain of Custody | Log & Artifact Analysis

CERTIFICATION

C-DAC Hyderabad - Machine Learning	Cisco (CCNA) 200-301 GenAi/ML
Certified Black Hat Pentester (EC – Council)	National Institute of Security Markets & SEBI
IT Security Specialist (LinkedIn)	Quick Heal – CyberShiksha
Computer Forensics & Security (LinkedIn)	THM Advent of Cyber (TryHackMe)
Threat Modeling & Vulnerability Management (LinkedIn)	Advanced Microsoft 365 Suite

WORK EXPERIENCE

Digital Forensics Intern | National Cyber Forensic Laboratory (CFSL)

MAY 2026 – JUN 2026

- Assisted in digital forensic investigations of cybercrime cases under law enforcement supervision.
- Performed disk, memory, mobile forensics using tools like Autopsy, EnCase, FTK, and Oxygen Forensics.
- Analysed forensic images and system artifacts to identify unauthorized access and malicious activity.
- Conducted log analysis and timeline reconstruction to support investigations.
- Performed network and OS-level analysis to identify attacker behaviour and IOCs.
- Correlated system and network data to detect suspicious activity and potential intrusion patterns.

Campus Ambassador | LinkedIn

JAN 2024 – DEC 2024

Conducted webinars, boosted campus engagement, and strengthened skills in communication, leadership, and community building.

- Represented LinkedIn for professional development and career networking

Project Intern | Indira University

JUN 2023 – NOV 2023

- Worked with IGI, actively collaborating with the Amazon Web Services (AWS) Cloud Team.
- Contributed to mainframe design and cloud integration initiatives.
- Assisted in the implementation of cloud infrastructure solutions using AWS services.
- Supported cloud operations to ensure scalability, reliability, and performance.

PROJECT

BeSafe – Smart Personal Safety System (App + Wearable Device)

- Designed a hardware-software integrated safety solution for instant emergency reporting.
- Implemented multi-trigger SOS activation (gesture, power button, wearable input).
- Enabled live tracking, alerts, and evidence capture (audio/video) with cloud integration.
- Achieved patent filings (India & USPTO) and won IGI Hackathon & IIC awards.

Hyper-X Injector – HID Keystroke Injection Framework for Security Evaluation & Training

- Developed a USB HID-based attack simulation framework using Raspberry Pi Pico and DuckyScript.
- Implemented dynamic payload execution with manual trigger control for safer and flexible testing.
- Simulated real-world keystroke injection attacks to evaluate endpoint security mechanisms.
- Conducted forensic analysis of HID attacks, identifying artifacts such as USB logs and process traces.

Biometric-Based Payment System (Conceptual Design)

- Designed a biometric payment system integrating UID authentication with banking infrastructure.
- Developed secure workflow for fingerprint-based transaction processing and backend verification.

ACCOMPLISHMENT

- Special Mention at IGI Hackathon and 1st Prize at Institute Innovation Council (IIC) for BeSafe project.
 - Secured 1st Position in CyberTank (Cybersecurity Competition) and Tech Parliament.
 - Delivered cybersecurity & digital forensics sessions as guest speaker and trainer at academic institutions.
 - Secured 2nd Position at National Conference on Opportunities and Challenges in Forensic Sciences.
 - Filed provisional patents under Intellectual Property India and the United States Patent & Trademark Office.
 - Worked with Pune Cyber Cell on cybercrime investigations involving digital forensics and evidence analysis.
 - Ranked in Top 5% in national and international CTF competitions as a team lead.
-
