HIMANSHU RANE

CYBERSECURITY ANALYST | SECURITY ENGINEERING | DIGITAL FORENSICS
+91 8237827752 | himanshu.rane.304@gmail.com | LinkedIn: ranehimanshu | Portfolio: himanshurane.github.io

OBJECTIVE

Cybersecurity postgraduate with hands-on experience in security engineering, threat detection, vulnerability assessment, cloud security, and incident response. Skilled in security operations, Linux system hardening, SIEM, network security, and digital investigations. Experienced in developing security automation and compliance frameworks, with growing expertise in AI/LLM security and secure application development.

EDUCATION

M.Sc. Cyber Security | National Forensic Sciences University (NFSU) 2025-27
Diploma in Cyber Law | Savitribai Phule Pune University (SPPU) 2025-26
B.Sc. Cyber Security | Savitribai Phule Pune University (SPPU) 2022-25

KEY SKILLS

Security Engineering: Vulnerability Assessment, Security Auditing, Network Security, Incident Response
SIEM & Threat Detection: Splunk, Wazuh, ELK Stack, Sysmon, Log Analysis, Threat Detection
Digital Forensics: Autopsy, EnCase, FTK, Magnet AXIOM, Cellebrite UFED, Oxygen Forensics, Volatility, PEStudio
Security Testing & Networking: Burp Suite, Nmap, Wireshark, Nessus, Metasploit, Network Traffic Analysis
Cloud & Programming: AWS (EC2, S3, IAM, CloudTrail, GuardDuty), Python, Bash
AI & LLM Security: Prompt Security, LLM Security, AI-Assisted Security Testing
Soft Skills: Leadership, Communication, Critical Thinking, Problem Solving, Teamwork, Public Speaking

CERTIFICATION

Certified Black Hat Pentester (EC – Council)
Certified LLM Security Professional (CLLMSP)
National Institute of Security Markets & SEBI
Computer Forensics & Security (LinkedIn)
Threat Modeling & Vulnerability Management (LinkedIn)
Cisco (CCNA) 200-301 GenAi/ML
C-DAC Hyderabad - Machine Learning
IT Security Specialist (LinkedIn)
THM Advent of Cyber (TryHackMe)
Quick Heal – CyberShiksha

WORK EXPERIENCE

HPC Security Intern | Centre for Development of Advanced Computing JUNE 2026 – OCT 2026

- Developed a Linux OS Hardening & Compliance Framework for HPC environments.
- Integrated Lynis and OpenSCAP for automated security assessments.
- Built controlled remediation with backup, rollback and verification mechanisms.
- Implemented risk analysis, policy evaluation and remediation planning.

Cybersecurity & IT Infrastructure Security | UJA MAY 2026 – OCT 2026

- Conducted enterprise security assessments across network, server and endpoint environments.
- Worked on Wazuh SIEM deployment and security monitoring.
- Supported firewall reviews, network segmentation and infrastructure hardening.
- Assisted with vulnerability assessments, MFA and access-control reviews.
- Contributed to backup, disaster recovery and IT security policies.

Digital Forensics Intern | National Cyber Forensic Laboratory (CFSL) MAY 2026 – JUN 2026

- Assisted in digital forensic investigations of cybercrime cases under law enforcement supervision.
- Performed disk, memory, mobile forensics using tools like Autopsy, EnCase, FTK, and Oxygen Forensics.
- Analysed forensic images and system artifacts to identify unauthorized access and malicious activity.

Campus Ambassador | LinkedIn JAN 2024 – DEC 2024

- Conducted webinars, boosted engagement, strengthened communication and community building.
- Represented LinkedIn for professional development and career networking

Project Intern | Indira University JUN 2023 – NOV 2023

- Worked with IGI, actively collaborating with the Amazon Web Services (AWS) Cloud Team.
- Supported cloud operations and infrastructure to ensure scalability, reliability, and performance.

PROJECT

Web Application Security Assessment – TaskFlow & EventHub

- Conducted security assessments identifying vulnerabilities including Stored XSS and IDOR/BOLA.
- Implemented security fixes and regression tests to validate input handling and access-control mechanisms.

PromptShieldAI – AI/LLM Security

- Developed an AI-powered application using Gemma and Flask for prompt security and LLM threat detection.
- Explored prompt injection risks and security analysis techniques for AI-powered applications.

BeSafe – Smart Personal Safety System (App + Wearable Device)

- Designed a hardware-software integrated safety solution for instant emergency reporting.
- Achieved patent filings (India & USPTO) and won IGI Hackathon & IIC awards.

Hyper-X Injector – HID Keystroke Injection Framework for Security Evaluation & Training

- Developed a USB HID-based attack simulation framework using Raspberry Pi Pico and DuckyScript.
- Simulated real-world keystroke injection attacks to evaluate endpoint security mechanisms.

Biometric-Based Payment System (Conceptual Design)

- Designed a biometric payment system integrating UID authentication with banking infrastructure.
- Developed secure workflow for fingerprint-based transaction processing and backend verification.

ACCOMPLISHMENT

- Industry & Community: IBM Bob, GitHub Dev Days, AWS Community Day & Students Community Day.
- Technical Speaking: Delivered cybersecurity and digital forensics sessions at academic institutions and industry training programs across India.
- Hackathon & Innovation: 1st Prize, IIC Hackathon; Special Mention, IGI Hackathon; Best Tech Ideathon.
- Cybersecurity Competitions: 1st Position, CyberTank & Tech Parliament; Top 5% in National and International CTFs – Team Lead.
- Research & Intellectual Property: 2nd Position, NFSU Conference; Provisional Patent (India & USPTO).
- Community Engagement: DEF CON Pune 2025, AWS and Pune Developer Community initiatives.
